About the GEIPP-II Ukraine project

In the framework of the **Phase II of the “Global Eco-Industrial Parks Programme (GEIPP-II) in Developing and Transition Countries”** currently implemented by UNIDO, the project **“Eco-Industrial Parks Programme II–Ukraine Country Level Intervention” (GEIPP-II Ukraine)** will address eco-industrial park (EIP) development in Ukraine.

About the GEIPP-II Programme

The objective of the second phase of the **GEIPP-II** is to promote circular economy approaches in industries, to mitigate the climate impact of industries and to help the industrial parks to adapt to the negative consequences of climate change.

The Programme will achieve this by continuing to facilitate the uptake of Eco-Industrial Park approaches in **scaling up resource efficiency, minimizing waste, promoting recycling and improving economic, environmental and social performances of businesses**, thereby contributing to inclusive and sustainable industrial development in a circular economy.

Technical support for the project

GEIPP-II Ukraine

In the framework of the **GEIPP-II Ukraine** project, the **Resource Efficient and Cleaner Production Centre** provides technical support for identifying and assessing the performance of industrial parks in Ukraine.

For selected industrial parks/zones/clusters, we will conduct a series of assessments, including using the resource efficient and cleaner production methodology, and hold a series of educational events, including on institutional capacity building in the field of gender equality.

Contract implementation stages

1 Development of a work plan

A work plan has been developed with a list of tasks and planned activities assigned to experts and specialists for each stage of the contract implementation

3 Organization of a hybrid seminar to raise awareness of EIP approaches

The seminar should encourage industrial parks, industrial zones, and clusters to continue participating in the project

5 Assessment of two selected IPs

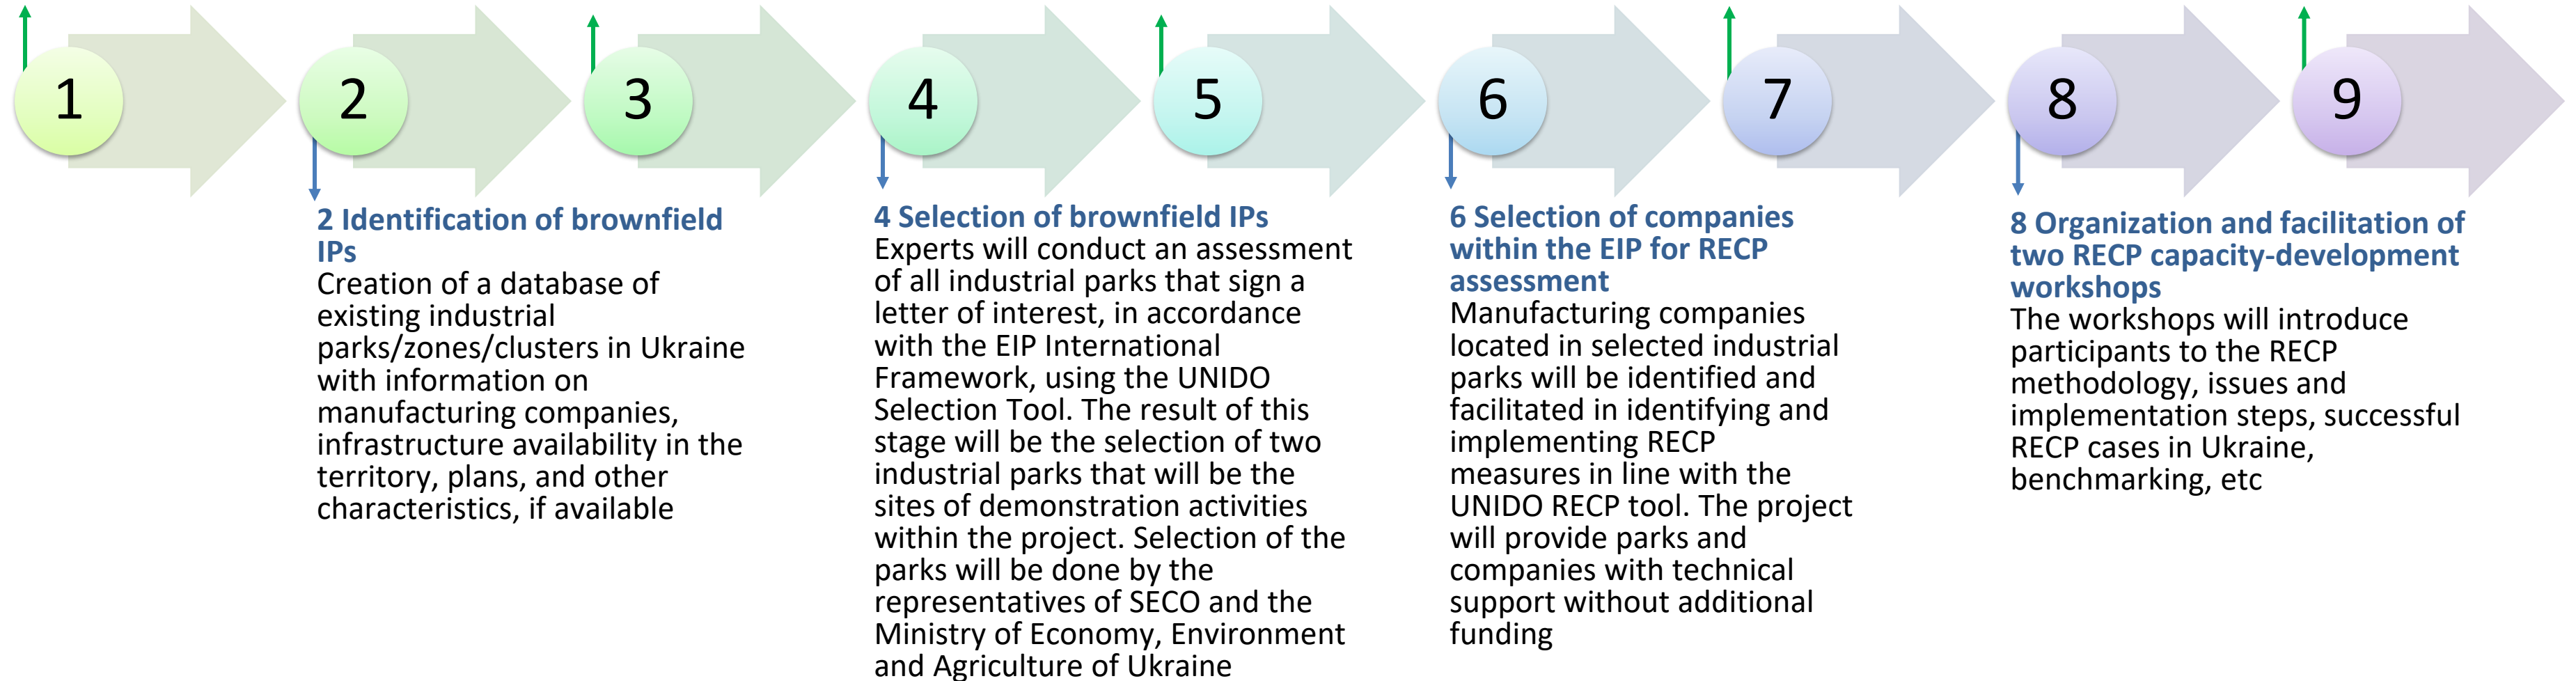

In cooperation with UNIDO experts, two selected IPs will be assessed using the UNIDO "Assessment Tool" and UNIDO "Gender Self-Assessment Tool". The potential of the IP will be identified, its effectiveness will be determined, and the expected economic, environmental, and social impacts, financial benefits, and gender equality measures will be assessed

7 Organization of two capacity-building events on gender equality

The events will focus on gender issues in Ukraine, gender equality in technical professions, and familiarization with international requirements and best practices in this area

9 Assessment of ten selected companies for each of selected IP

Conducting an assessment of RECP, IS, and gender equality at the company level using the UNIDO RECP monitoring tool, the industrial symbiosis identification tool, and the company gender equality self-assessment tool

Key tasks

The **GEIPP-II Ukraine** project is in line with strategic national and regional development priorities and helps address key challenges in the following areas:

Business support: The project will include a set of assessments, including: analysis of industrial parks according to the International EIP Framework, assessment of participating enterprises using the RECP methodology, and analysis of opportunities for industrial symbiosis. A gender assessment will also be carried out and a series of educational events will be organized. This will identify potential for improvement and ensure the development of measures to enhance performance in environmental, social, and economic categories.

Environment and energy efficiency: Participation in the project and implementation of related measures will contribute to reducing the negative impact of industry on the environment, increasing energy efficiency, and rational use of resources.

Waste management: Implementing the principles of circular economy and industrial symbiosis will enable waste to be transformed into valuable resources, creating new economic opportunities for the region.

What are your benefits?

Our cooperation will help to achieve:

Cost reduction. We will help identify and eliminate losses (water, energy, raw materials), which will significantly reduce production costs.

Increased efficiency. RECP assessments will help identify improvement possibilities of technological processes, thus contributing to increased productivity and improved product quality.

Reduced environmental footprint. By implementing our recommendations, you can reduce waste and emissions, which will have a positive impact on the company's environmental performance and reputation.

Consulting support. Based on the results of the assessments, we will provide relevant reports and consulting support for the implementation of the proposed options.

Strengthening competitiveness. Optimized processes and reduced costs will make the company more attractive to customers and investors.

Commitment letter

НА БЛАНКУ ОРГАНІЗАЦІЇ

COMMITMENT LETTER WITHIN GEIPP-II UKRAINE

By this letter, _____
(name of the industrial park managing company, enterprise of the industrial zone, or production cluster)

expresses its interest and readiness to join the “Eco-Industrial Parks Program II – Ukraine: Country-level intervention”(GEIPP-II Ukraine).

We express our interest in introducing modern management approaches based on the **Eco-Industrial Park (EIP) model** in accordance with the International Framework for EIPs. The criteria defined by the International EIP Framework ensure a comprehensive approach to the sustainable development of industrial areas, strengthen the market position of businesses, and enhance partnerships among enterprises.

We kindly request you to consider our (park, zone, or cluster) for participation in the GEIPP-II Ukraine and assess our compliance with the specified criteria.

Signing this letter does not imply any financial obligations on the part of _____
(name of the industrial park managing company, enterprise of the industrial zone, or production cluster).

We look forward to fruitful cooperation.

Sincerely,

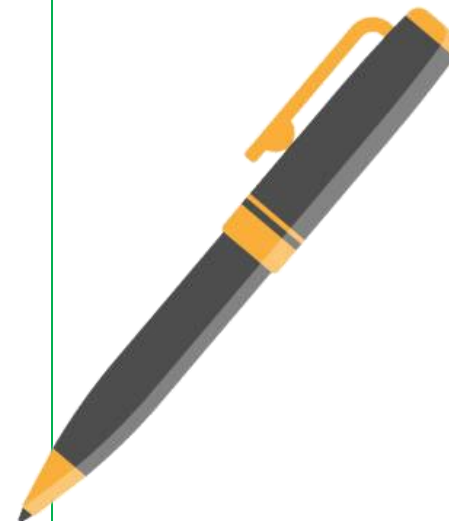

Full Name
